

Battle of the Bins

Contest Guidelines

Thank you for signing up to be part of Keep Albuquerque Beautiful's First Annual Battle of the Bins art contest! We are very excited to see the creative designs the different teams develop. Before you start on your entry here are some important rules and dates to keep in mind.

Bin Creation

Once KAB receives your registration, we will deliver the bins to your school. Details for bin creation are:

- Use recycled materials to decorate your bin. These materials can be collected from the classroom or brought in by students. Paints and markers may be used in your design.
- Classrooms must compete individually.
- Remember the bin must still be able to function as a recycle bin for your classroom.
- Objects added to the bin can not extend more than one foot. The bin must stand on its own.
- Make sure that everything on the bin is secure so that nothing will fall off during transport.

At the end of this document please find a picture of an example bin to help guide you in this process.

Submission and Judging

Teachers need to send pictures of the finished bins to milaromero@cabq.gov by Friday, December 13, 2019. Please make sure the pictures are of the bin only to help with the judging process. A picture of the classroom with the bin may be submitted. Along with the submission, please send in the name of your art piece and a short paragraph describing the inspiration for your bin design.

The pictures will be sent to a panel of community judges who will vote for the top three bins. The top three winners will be announced and contacted the week of December 16th.

Prizes and Display

If your classroom's bin wins, we will contact you and schedule a time to pick up the bin for display. We will also deliver your prizes and traveling trophy to be displayed in your classroom until the start of the next year's contest.

SAMPLE IDEA: Recycle Anywhere

Our bin Recycle Anywhere shows the worlds of desert and sea coming together. It represents that no matter where you are you can recycle and your efforts in doing so will help our whole planet. By recycling everywhere, we are working to keep our communities clean and protecting other creatures we share the planet with. Our bin represents a clean environment for all of us.
