

## Collage Litter Map

**Prep Time:** 20 minutes

**Skill Level:** Hard

**Total Time:** 40 + minutes

### Materials:

- Litter or other trash
- Construction paper or cardboard at least 12" by 18"
- White Glue
- Pencil and eraser
- Map

### Advice:

Look for trash in your school and on your playground. Don't forget your room, desk, even your pockets and school bags. If you work with other people in your class or scout troop, this can be a fun group activity. Draw the map on a large cardboard flat rescued from a refrigerator or freezer carton.

### Instructions:

Study the shape of the United States on the map. Trash is a problem all over the world. Using a pencil, draw this outline on the background support. Pay special attention to the Great Lakes and states like Florida and Texas whose shapes help identify your finished picture as a map of the United States.

Being careful to follow the shape you have drawn, fill in the outline solidly by gluing the trash you have collected all over the map. You just recycled! Your collage may be displayed with the "America the Beautiful?" title. This will help remind others to keep the World clean.
