

## Litter Bug

**Prep Time:** 15 minutes

**Skill Level:** Medium

**Total Time:** 35 + minutes

### Materials:

- Trash/Recyclables (Straws, Bottle Tops, Caps)
- Newspaper
- String
- Glue Gun
- Glue Sticks
- Google Eyes (Optional)
- Scissors (If needed)

**Advice:** Prior to working on your project, collect different types of litter that is found around the school, yards, and classroom. During step 1 and 2, if the newspaper does not stay into a ball, use masking tape to help hold it into place.

### Instructions:

1. Crumple up a piece of newspaper into a ball shape.
2. Wrap another piece of newspaper around the formed ball to secure it.
3. Wrap a string around the newspaper ball to help hold it into place.
4. Add straws, bottle tops, caps... anything to make it look like a litter bug. Do this by using the hot glue gun.
5. If you are unable to find material that looks like eyes, Google eyes work great.
6. Create your litter bug to look however you want using your found material
7. Once you are done, display them for people to see what litter can be reformed into.
